Basic Components

Most apps will end up using one of these basic components.

View

The most fundamental component for building a UI.

Text

A component for displaying text.

Image

A component for displaying images.

TextInput

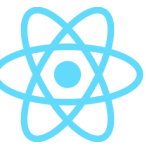

A component for inputting text into the app via a keyboard.

ScrollView

Provides a scrolling container that can host multiple components and views.

StyleSheet

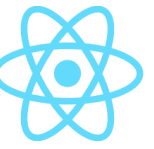

Provides an abstraction layer similar to CSS stylesheets.

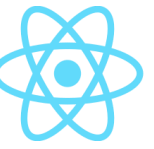

Image

```
<Image
  style={styles.tinyLogo}
  source={require('./assets/icon.png')}
/>
```

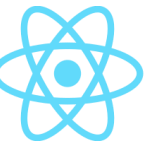

```
<Image
  style={styles.tinyLogo}
  source={{
    uri: 'https://reactnative.dev/img/tiny\_logo.png',
  }}
/>
```

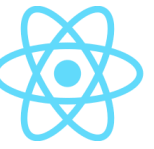

ImageBackground

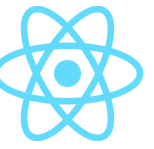

Pressable

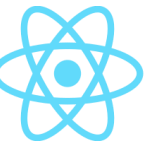

SafeAreaView

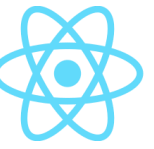

TextInput

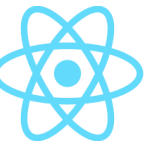

TouchableOpacity

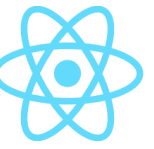

TouchableHighlight

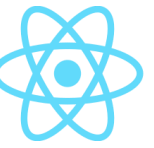

FlatList

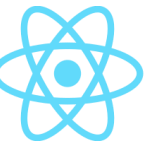

SectionList

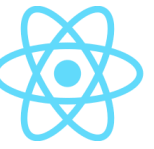

Modal

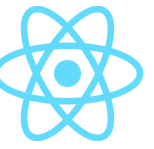

KeyboardAvoidingView

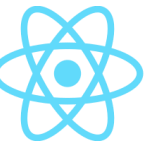

RefreshControl

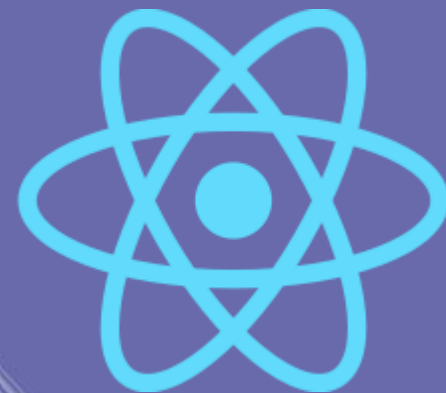

ScrollView

Switch

TouchableWithoutFeedback
