DEBUGGING (FIXING ERRORS)

JS

WHAT IS A SOFTWARE BUG?

- 👉 **Software bug:** Defect or problem in a computer program. Basically, any **unexpected or unintended behavior** of a computer program is a software bug.
- 👉 Bugs are **completely normal** in software development!

- 👉 Previous example: "We need a function that reverses whatever we pass into it"

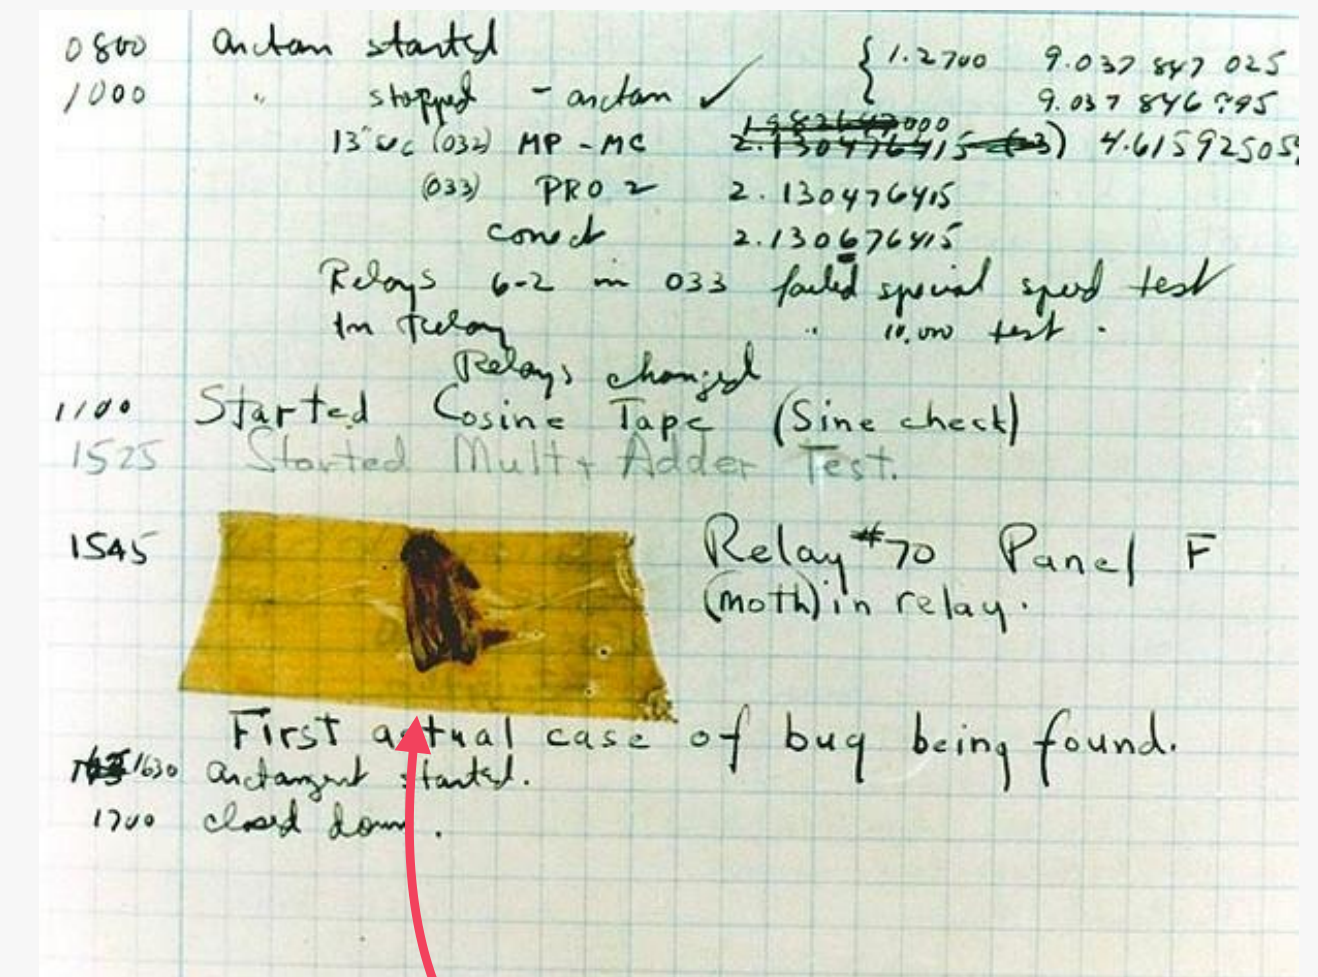

`reverse([1, 3, 5, 7])`

`[5, 1, 7, 3]`

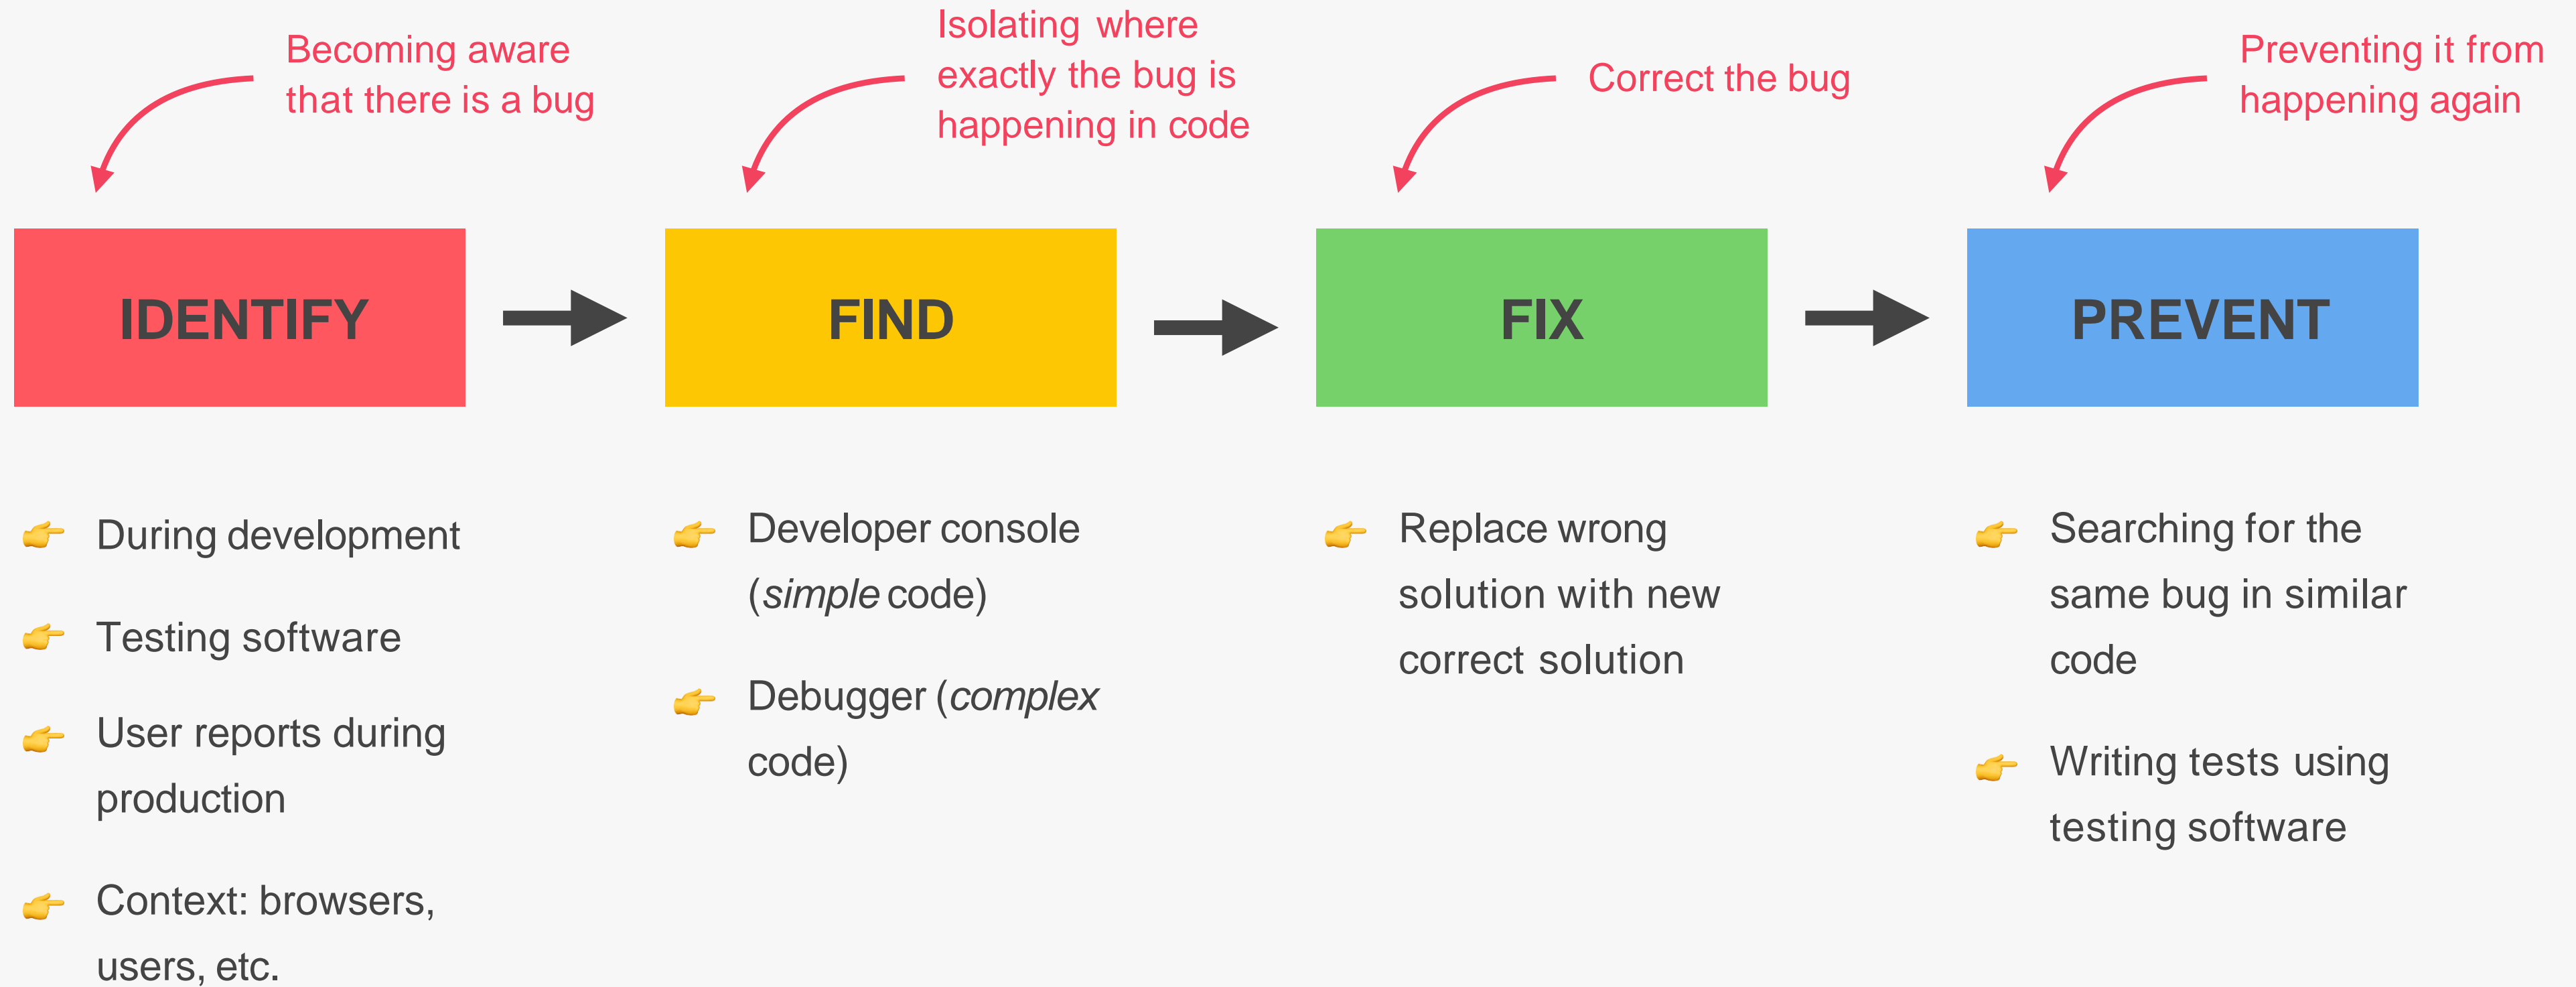

Unexpected result: the array is scrambled, **NOT** reversed. So there is a **bug** in the **reverse** function 🐛

- 👉 Debugging: Process of finding, fixing and preventing bugs.

A real bug which was causing an error in Harvard's computer in the 1940s
